PROFILE

Informatics Engineering graduate with a GPA of 3.94/4.00, passionate about mobile application development and IT support. I enjoy building cross-platform mobile applications using Flutter and Dart, supported by back-end development with PHP and MySQL. I also have knowledge of computer networking, hardware and software troubleshooting, and IT operations. During my internship at PT Tolan Tiga Indonesia, I gained practical experience in device installation, troubleshooting operational equipment, data management, and document verification. I also served as Team Leader in the Kampus Mengajar program, where I coordinated activities and collaborated with various stakeholders. I am a detail-oriented, responsible, and adaptable individual who enjoys solving problems, learning new technologies, and developing reliable solutions.
